

Hydra Pac® Die Splitting Equipment

The heart of the system is the Enerpac/Hydra Pac® hydraulic pump combination. Here is what makes this the best power pack available:

- 1/2 hp, 115 VAC submerged motor
- 15 gallon reservoir
- 4 manual directional control valves
- 4 pressure gauges
- Jog/Run remote handheld pendant station
- Independent lift point control
- Motor will run on 60 VAC (permits use of extension cords)
- Filtration system

Manufactured to ISO 9002-2000

Hydra Pac®

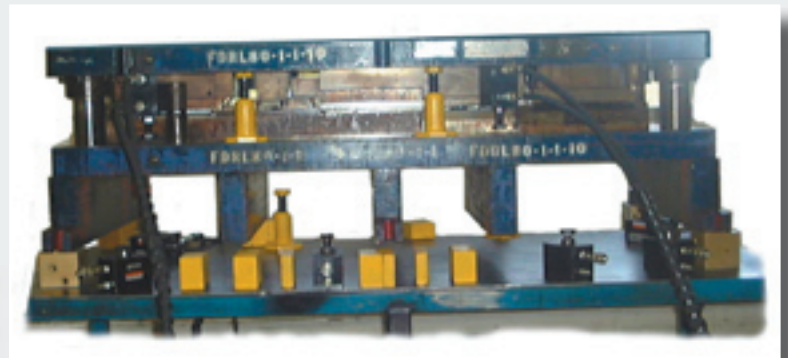

Cylinder Specifications:

- 15,200 lbs. lifting force per cylinder
- 60,800 lbs. total force per set of 4 cylinders
- 2.0 inches of stroke
- 1.25 inch jack screw adjustent
- Double acting cylinders
